

ReTakTM

Road Dust Control Solution

A chloride-free option with environmentally friendly dust-control solutions

ReTak Road offers a chloride-free, eco-friendly solution for dust control through its exclusive plant-based formula that can be customized to meet project requirements while promoting sustainability.

Non-toxic to roadside vegetation Non-corrosive to vehicles and equipment

ReTak Road utilizes a plant-based solution to absorb dust particles and aggregate larger particles, simultaneously increasing surface stability.

Controls fugitive dust over 25x more effectively than water alone

Through an interval-based solution, **ReTak Road** minimizes the need for water and maintenance applications, even in harsh environments or during processes such as road grading. **ReTak Road** is a cost-effective and environmentally friendly solution that provides extreme durability for your dust control needs.

Application

Recommended effective dilution rate is ~1.0L per M² of roadway. **ReTak Road** application rates vary according to soil conditions, traffic and climate. Customers are encouraged to fit the **ReTak Road** dosage to their specific conditions. As a natural plant-based solution, **ReTak Road** will decompose over time leaving no lasting effects to the environment. Functional longevity up to 6 months depending on conditions.

KEY FEATURES

Organic Based & Biodegradable

Non-toxic & Non-corrosive

USDA Certified Bio preferred

Simple Application

Rejuvenated with Water

Cost-Effective

Easy Equipment Cleanout

**Reduction of PM5 & PM10
Dust Particles**

PACKING AND SHIPPING

**264 IBC Totes: 264 Gal / 1000L
or bulk**
